

Profile Summary

Computer Science graduate with one year of hands-on experience as a Software Engineer and Business Analyst, delivering fullstack and mobile solutions for a fintech management platform. Experienced in building fullstack features end-to-end, including data validation and error-handling workflows for Excel/CSV-based systems, using Docker, Yii Framework, PHP, and JavaScript, as well as developing mobile applications from scratch with React Native, Expo, TypeScript, and Firebase. Complemented by a solid business analysis background, including BPMN, user flow design, and technical documentation, with strong cross-functional collaboration skills across Product, Finance, and Vendor teams.

Education

- **Bina Nusantara University (Bandung)** **September 2021 - Agustus 2025**
Bachelor Degree in Computer Science, 3.19/4.00
- **STMIK LIKMI Universtiy** **September 2025 - Present**
Master Degree in Information System

Relevant Coursework

- Web Programming and Development
- Database System and Management
- Object Oriented Programming
- Software Engineering and System Analysis
- Mobile Application Development

Work Experience

Pt Bank Central Asia – Business Analyst **February 2024 – February 2025**

- Designing Functional Flows (Such as BPMN Diagram) for 3 Ongoing projects, to ensure clear communication of the requirements and expected system behaviours.
- Created User Flows for all features in 3 Ongoing projects to visually represent the end-user experience and ensure that the application process would align well with the business needs.
- Developing UI mockups based on multiple feedbacks given by the stakeholders, vendors and product managers to ensure alignment with business objectives.
- Creating Technical Documentations and Data Mappings for all assigned features, which supports the team in implementation and knowledge transfer across teams.
- Collaborating with Product Managers, Vendors and Developers in Scrum meetings to align each work tasked with project milestones.

WZ Technology – Software Engineer **December 2025 – June 2026**

- Delivered the Budgeting sub-feature within a Fintech Management application used by GA, Finance & Supplier teams, enabling users to view uploaded Excel-based budgeting lists, export data to CSV, and receive cell-level validation feedback with error messages for invalid upload entries. Built fullstack using Docker, SQLyog, Yii Framework, JS, and PHP.
- Built a mobile version of the web application from scratch, covering 3 main pages: Dashboard (data summary & notifications), Request Page (approval workflow with role-based access controlled by the Backend team), and Profile (theme settings, cache clearing, logout). Worked as Frontend developer using Expo, React Native, TypeScript, JS, and Firebase API.

Skills

- **Technical Skills**
 - Web Development (Node JS, JavaScript, PHP, Yii Framework, Vite, Tailwind CSS, React, Laravel, Electron)
 - App & Feature Design (Figma, Canva)
 - VCS (Git, Github)
 - Mobile Development (Android Studio, Kotlin + Java, React Native, Expo, TypeScript)
 - Database Management System (MySQL, Postgre SQL, Oracle, SQLyog, NeDB)
 - DevOps & Backend Services (Docker, Firebase API)
 - LLM Integration (Google Gemini API)
- **Soft Skills**
 - Problem Solving and Analysis
 - Communication and Collaboration
 - Adaptability and Continuous Learning
 - Critical and Creative Thoughts
